

STRUCTURED NOTES

CAPTURE • ORGANIZE • UNDERSTAND • APPLY

Name Eduardo Perez
Course / Subject PM
Speaker / Class Carlos Pichardo
Date & Time 2-10-26

KEYWORDS & KEY CONCEPTS

- `int gab[5]` - arreglo de 5 posiciones
- `int i = 0` - indice / contador
- Asignación, 5, 50, 25, 65, 155

Focus on the key concepts that generate value and understanding.

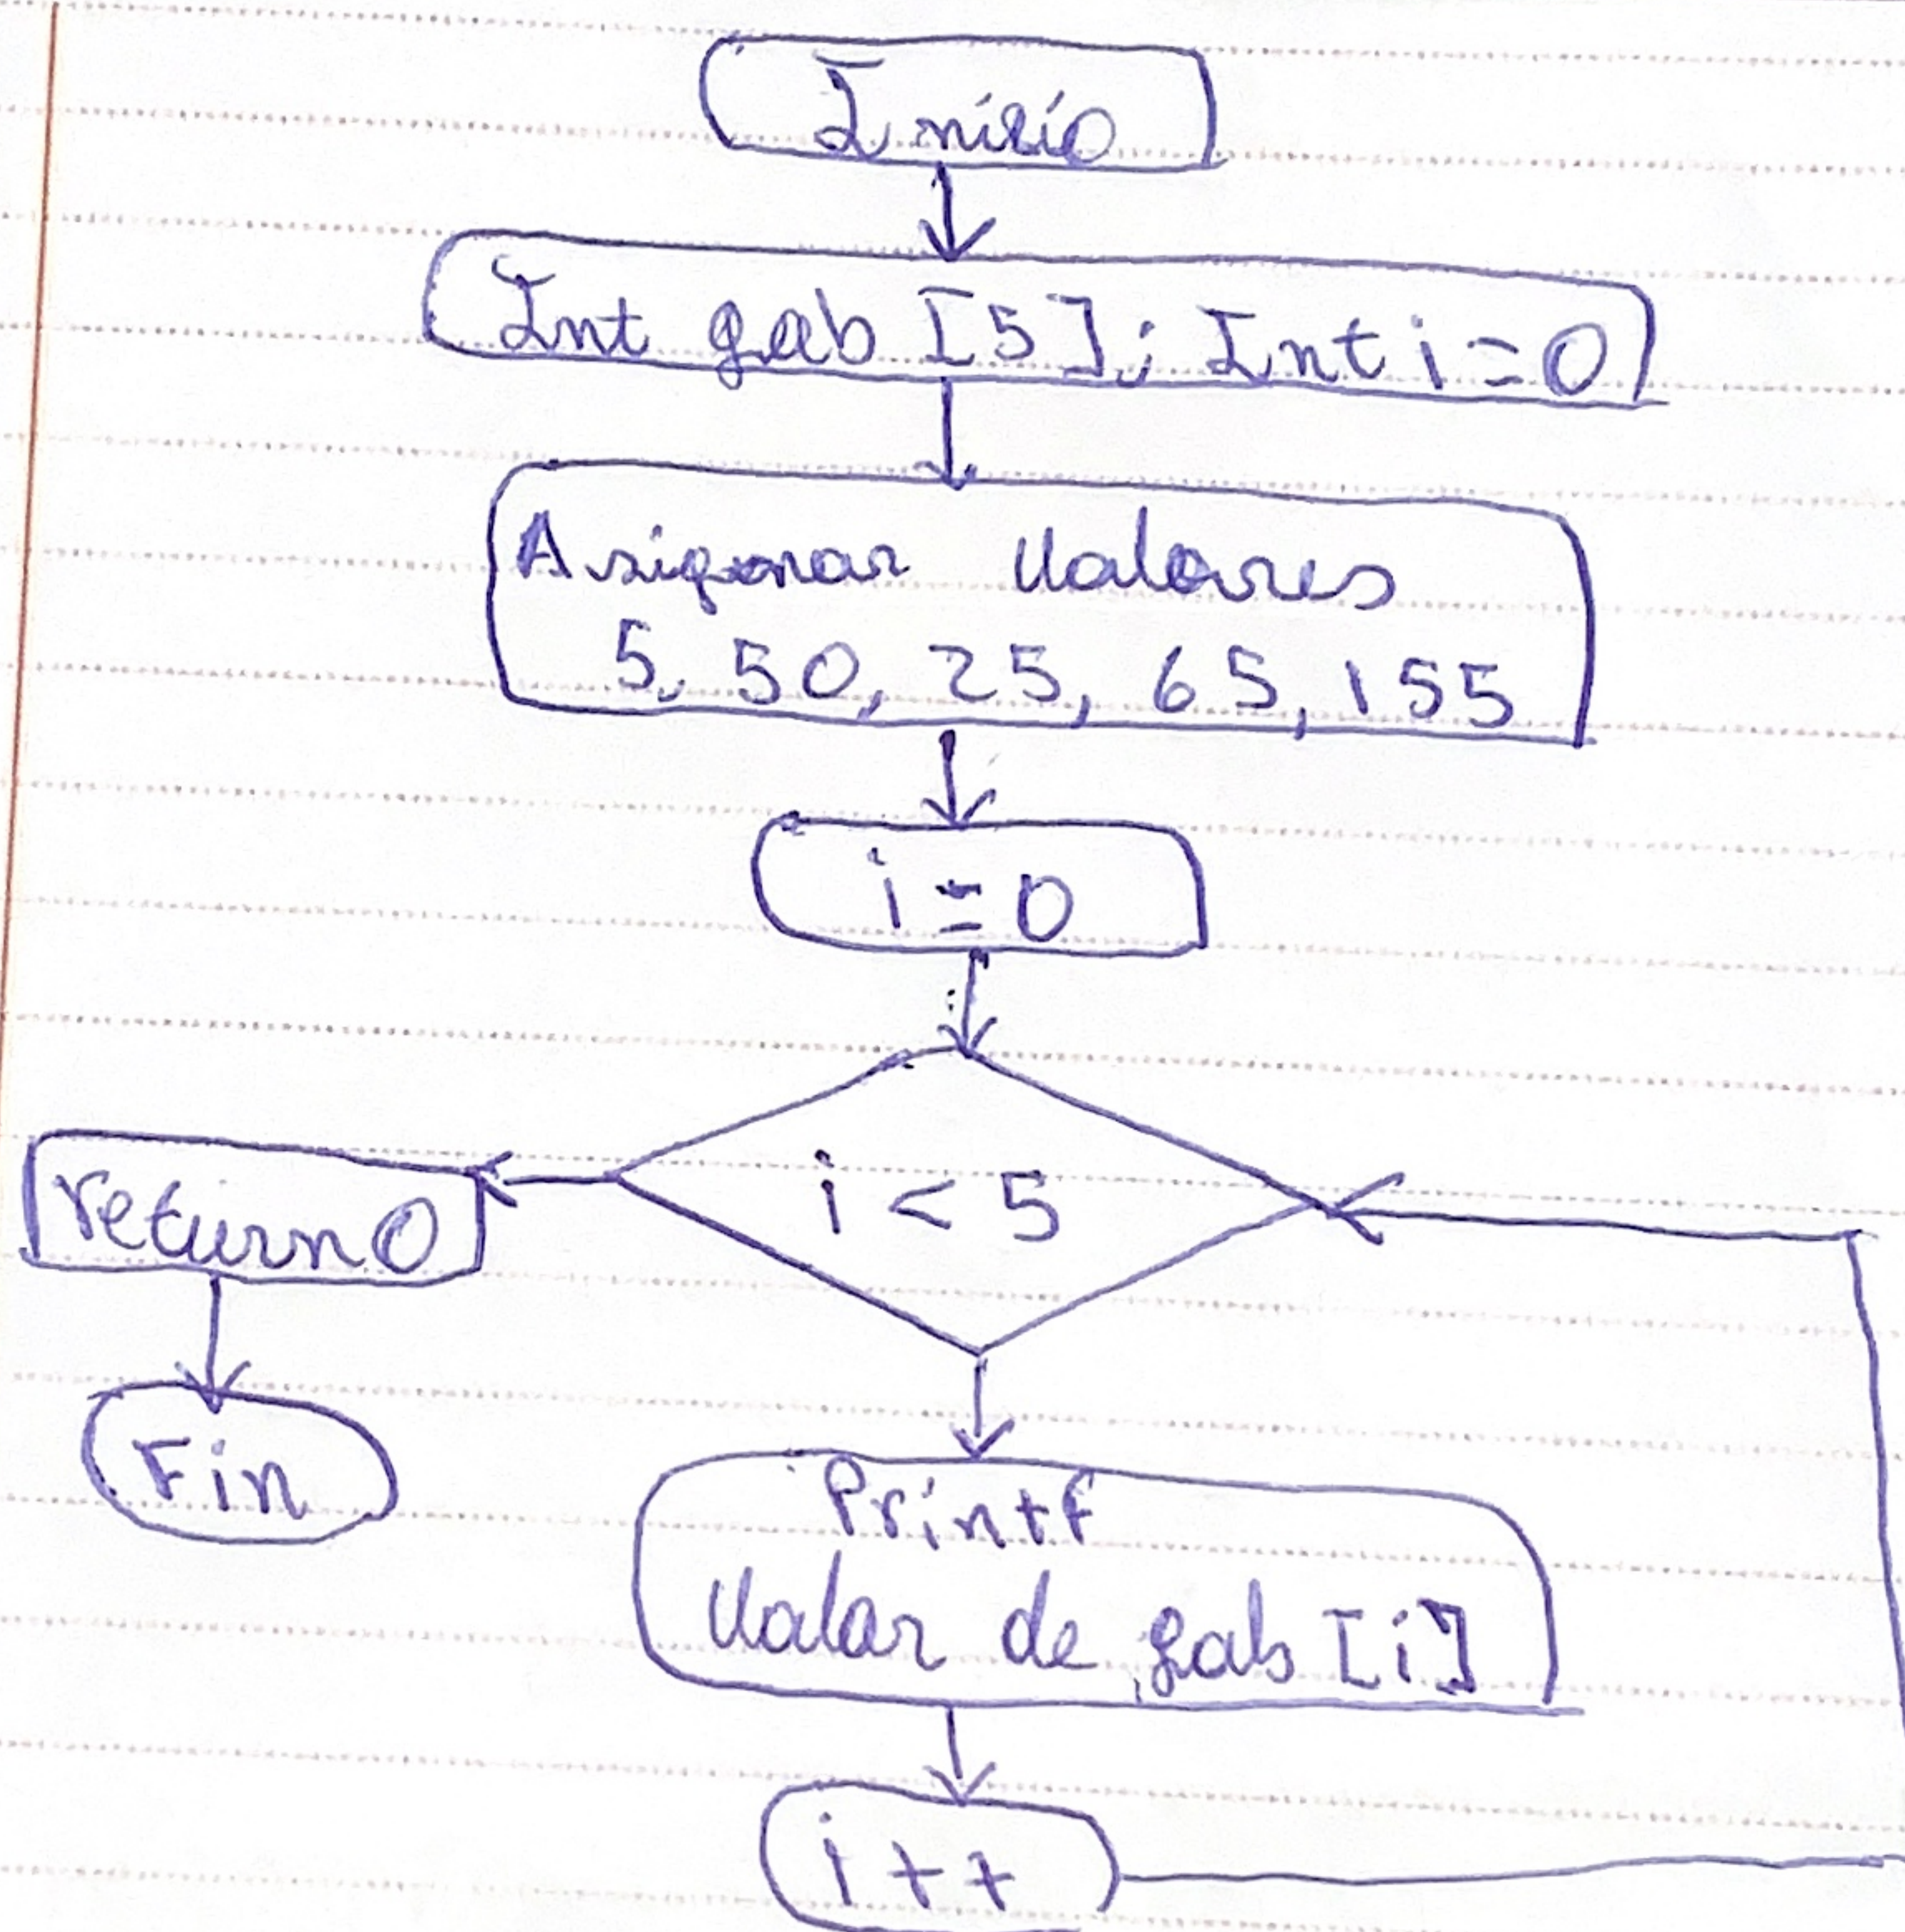

ACTIONS / NEXT STEPS

- ☐
- ☐
- ☐
- ☐
- ☐

Turn knowledge into action. Small steps, big results.

NOTES

Title: Diagrama de flujo de Buble Sort

QUESTIONS & REFLECTIONS

What questions do I have?

What is unclear or confusing?

What ideas connect?

How can I apply this?

What assumptions should I challenge?

SUMMARY

Write a brief summary of the main points.

KEY TAKEAWAY

Capture the most important insight.

Carlos Pichardo Vinque

STRUCTURED NOTES

CAPTURE • ORGANIZE • UNDERSTAND • APPLY

Name Edwardo Perez
Course / Subject PM
Speaker / Class Pichardo
Date & Time 8-10-26

KEYWORDS & KEY CONCEPTS

- Hexadecimal
- -base 16
- Informatica
- y Computa
- cion
- Byte / octeto
- = 8 bits

Focus on the key concepts that generate value and understanding.

ACTIONS / NEXT STEPS

- ☐ Investigar
- ☐ Porque 1 byte
- ☐ = 2 digitos hex
- ☐
- ☐
- ☐

Turn knowledge into action.
Small steps, big results.

NOTES

Title: Sistema Hexadecimal

Topic: _____

El sistema hexadecimal tiene base 16 y utiliza dieciséis símbolos: los números del 0 al 9 y las letras de la A a la F.

Con la particularidad de que a las letras se les asigna el siguiente valor: A = 10, B = 11, C = 12, D = 13, E = 14 y F = 15

Ej: Convertir a E8A7.3D₁₆ a octal.

Solución: El número dado primero se convierte a decimal.

$$E8A7.3D_{16} = 14 \times 16^3 + 8 \times 16^2 + 10 \times 16^1 + 7 \times 16^0 + 3 \times 16^{-1} + 13 \times 16^{-2} = 59559.2383_{10}.$$

QUESTIONS & REFLECTIONS

What questions do I have?

What is unclear or confusing?

What ideas connect?

How can I apply this?

What assumptions should I challenge?

SUMMARY

Write a brief summary of the main points.

KEY TAKEAWAY

Capture the most important insight.

Hexadecimal es el atajo para escribir binario largo de forma corta.

Carlos Pichardo Vinque

STRUCTURED NOTES

CAPTURE • ORGANIZE • UNDERSTAND • APPLY

Name Edwardo Perez
Course / Subject PM
Speaker / Class Carlos Pichardo
Date & Time 8-10-26

KEYWORDS & KEY CONCEPTS

- Sistema binario
- Bits: 0 y 1
- Valor Posicional
- Potencia de 2
- Conversión binario a decimal
- Parte entera y fraccionaria

Focus on the key concepts that generate value and understanding.

ACTIONS / NEXT STEPS

- ☐ Practicar conversión de números binarios a decimal

Turn knowledge into action. Small steps, big results.

NOTES

Title: Sistema binario

Topic: _____

El antiguo matemático indio Pingala presentó la primera descripción que se conoce de un sistema de numeración binario en el siglo III a. de C., lo cual coincidió con su descubrimiento del concepto del número cero.

El sistema binario moderno fue documentado en su totalidad por Leibniz, en el siglo XVII, en su artículo "Explication de l'Arithmétique Binaire". Leibniz usó el 0 y el 1, al igual que el sistema de numeración binario actual.

QUESTIONS & REFLECTIONS

¿Por qué la computadora solo usa 0 y 1?
La parte fraccionaria después del punto (.) se conecta con electricidad: 0 = apagado, 1 = encendido

What questions do I have?

What is unclear or confusing?

What ideas connect?

How can I apply this?

What assumptions should I challenge?

SUMMARY

Write a brief summary of the main points.

KEY TAKEAWAY

Capture the most important insight.

Carlos Pichardo Vinque

STRUCTURED NOTES

CAPTURE • ORGANIZE • UNDERSTAND • APPLY

Name: Edwardo Perez
Course / Subject: PM
Speaker / Class: Pichardo
Date & Time: 8-10-26

KEYWORDS & KEY CONCEPTS

- Conversion decimal a binario
- Aproximación / Precision

Focus on the key concepts that generate value and understanding.

ACTIONS / NEXT STEPS

- ☐ Convertir 28.34 Paso a Paso para verificar.

Turn knowledge into action. Small steps, big results.

NOTES

Title: Conversión de decimal

Topic: _____

Para Convertir en número decimal a binario Cuando tiene una Parte entera y una Fraccionera, se utilizan dos procedimientos:

• Parte entera: Se divide el número entre 2 y se anotan los residuos. Después, se leen de abajo hacia arriba.

• Parte fraccionaria: Se multiplica por 2 y se anotan los números enteros obtenidos, en el mismo orden.

Ej: $28.37_{10} \approx 11100.0101_2$ El resultado es aproximado porque la parte decimal puede necesitar más cifras binarias para alcanzar mayor precisión.

QUESTIONS & REFLECTIONS

What questions do I have?

What is unclear or confusing?

What ideas connect?

How can I apply this?

What assumptions should I challenge?

SUMMARY

Write a brief summary of the main points.

KEY TAKEAWAY

Capture the most important insight.

- ☐
- ☐

Turn knowledge into action.
Small steps, big results.

NOTES

Title: Sistema Hexadecimal

Topic: _____

El uso del sistema hexadecimal está estrechamente relacionado con la informática y con las ciencias de la computación, ya que las computadoras suelen utilizar el byte u octeto como unidad básica de memoria.

QUESTIONS & REFLECTIONS

What questions do I have?

What is unclear or confusing?

What ideas connect?

How can I apply this?

What assumptions should I challenge?

SUMMARY

Write a brief summary of the main points.

KEY TAKEAWAY

Capture the most important insight.

NOTES

Title: Sistema hexadecimal

Topic: _____

Ahora el número obtenido se convierte a octal:

Parte entera //	Restos	P. fracc //	entero
$59559/8 = 7444$	7	$0.2383 \times 8 = 1.9064$	1
$7444/8 = 930$	4	$0.9064 \times 8 = 7.2512$	7
$930/8 = 116$	2	$0.2512 \times 8 = 2.0096$	2
$116/8 = 14$	4	$0.0096 \times 8 = 0.0768$	0
$14/8 = 1$	6		
$1/8 = 0$	1		

QUESTIONS & REFLECTIONS
